

```
#include <stdio.h>
int main()
{
    int num, originalNum, remainder, result = 0;
    printf("Enter a three-digit integer: ");
    scanf("%d", &num);
    originalNum = num;
    while (originalNum != 0)
    {
        remainder = originalNum % 10;
        result += remainder * remainder * remainder;
        originalNum /= 10;
    }
    if (result == num)
    {
        printf("%d is an Armstrong number.\n", num);
    }
    else
    {
        printf("%d is not an Armstrong number.\n", num);
    }

    return 0;
}
```
