

```
#include <stdio.h>
int main()
{
    int num, originalNum, rem, fact, sum = 0;
    printf("Enter an integer: ");
    scanf("%d", &num);
    originalNum = num;
    while(num > 0)
    {
        rem = num % 10;
        fact = 1;
        for(int i = 1; i <= rem; i++)
        {
            fact = fact * i;
        }
        sum = sum + fact;
        num = num / 10;
    }
    if(sum == originalNum)
    {
        printf("%d is a Strong Number.\n", originalNum);
    } else
    {
        printf("%d is NOT a Strong Number.\n", originalNum);
    }
    return 0;
}
```
